Professional Summary

Driven Computer Science student at VIT Bhopal specializing in **Agentic AI** and **Full-Stack Development**. Proficient in building autonomous systems using **LangGraph**, **RAG**, and **FastAPI**. Proven track record in deploying scalable AI pipelines and real-time applications, with a strong focus on bridging the gap between LLM reasoning and production-grade software.

Technical Skills

- **AI & Machine Learning:** RAG Pipelines, LLMs, LangGraph (Cyclical Agents), LangChain
- **Backend & Data:** Go, FastAPI, Node.js, Python, SQL, Vector Databases (Pinecone, Chroma db)
- **Web Technologies:** React.js, Next.js, TypeScript, REST APIs, WebSockets (Socket.IO)
- **Cloud & DevOps:** AWS (EC2, S3), Docker, Git, Linux, Vercel, Render

Experience

- **Software Engineer Intern — Anankin (YC21)** *Bengaluru (Onsite) — May 2026 – Present*
 - Contributed to **reverse engineering** complex backend systems, intercepting and decoding obfuscated API contracts to expose hidden data endpoints.
 - Developed highly efficient, concurrent distributed scraping pipelines utilizing **AWS SQS**, **ECS**, **Glue**, and **MongoDB** for large-scale extraction.
 - Delivered mission-critical data acquisition tasks under strict deadlines, expanding data coverage capabilities and accelerating product rollout.

Featured Projects

- **NodeMind — Multi-Agent Framework** | [GitHub](#) *React Flow, Python, WebSockets, Chroma*
 - Engineered a **multi-agent framework** supporting 4 concurrent AI agents via atomic markdown nodes.
 - Built a state-sync engine using **Python Watchdog** and **WebSockets** for **<200ms** React Flow rendering.
 - Integrated **ChromaDB** for local semantic searches, reducing LLM context token consumption by **40%**.
 - Implemented dynamic routing logic to guarantee type-safe JSON schema validation during inter-agent handoffs.
- **AI Coding Agent — Autonomous CLI Assistant** | [GitHub](#) *Python, Gemini 2.5 Flash, Tool Calling*
 - Architected an **autonomous AI engineer** powered by **Gemini 2.5 Flash Lite** to read, write, and execute code.
 - Designed a **multi-turn reasoning loop** executing up to 20 tool calls to facilitate debugging cycles.
 - Implemented **strict security guardrails** and timeouts to securely sandbox Python file-system subprocesses.

Education

- **Vellore Institute of Technology, Bhopal** • B.Tech, CSE • GPA: 8.95/10.0 *Expected Aug 2027*
- **Delhi Public School, Hyderabad** • Class XII (92%) • **CS School Topper** *Apr 2022*
- **R.N. Podar School, Mumbai** • Class X (95%) *Mar 2020*

Leadership & Extracurriculars

- **Vice President — Edu4u Club, VIT Bhopal** *2026*
 - Leading a team of 35+ to organize technical workshops and educational outreach for 500+ students.
- **Anchor & Host — Advitya (Central India's Largest Fest)** *2023*
 - Served as the central stage host and lead orator, managing crowd engagement for a **5000+ live audience**.
- **1st Position — TechAstra Hackathon** *2023*

Achievements & Certifications

- **Competitive Programming:** Achieved **Pupil** rating (1241) on [Codeforces](#); solved **500+** algorithmic problems across Codeforces and [LeetCode](#).
- **Harvard CS50:** Introduction to Computer Science *2023*
